

## **COVID-19 Guidelines & Plan for Mitigation of Risk**

### **Status of Policies:**

These policies and practices were created based on the current recommended guidelines established by the Riverside County Department of Health, the California Department of Health, the CDC, and the American Camp Association. We continue to receive updates on a regular basis from these agencies, hence this document is subject to change based on any new guidance that we might receive. Please revisit these guidelines periodically for the most up-to-date information.

### **Staff:**

Our staff will quarantine through staff training, 10 days prior to the arrival of our family camp guests. Although we are not requiring our staff to be vaccinated, we highly recommend that they do so. Most of our staff will be fully vaccinated against COVID-19 upon their arrival to camp.

### **Health Screenings:**

Our staff and our family camp guests will receive daily temperature checks and health screenings. Our family camps guest will be asked to perform a pre-camp health screening the week prior to their arrival. Staff who are not vaccinated will be encouraged to stay at camp on their days off or to follow state and local guidelines, including social distancing and mask wearing, to limit exposure if they need to leave camp on their weekly day off.

### **Masks:**

Masks will be always worn, except when eating meals, at the pool, in the privacy of our family's guest room, or if your family is outside and is able to maintain at least 6 feet distancing from others.

### **Lodging:**

Every family will be assigned their own private room with its own private bathroom in our lodge. These rooms have no shared ventilation between them. In addition to enhanced cleaning and sanitizing practices between use, rooms will be vacant for more than the recommended 24-72 hours after cleaning.

### **Cleaning & Sanitizing:**

We will have increased sanitizing stations and provide each family camp guest with and individual-sized sanitizer which can be refilled throughout the session. We will also increase the frequency of sanitizing public areas.

**Session Size Limits:**

We will host a maximum of 30 families per session to facilitate adherence to the recommended social distancing guidelines. Masks and social distancing will be required of our staff and family camp guests. To facilitate this, we will only have two families at each activity area at a time.

**The “Greater” Outdoors:**

We will have a drive-thru registration and screening process in our parking lot upon the arrival of our family camp guests. All camp activities will be outdoors in the fresh mountain air under shade canopies. Our programs will also be held outside in areas/venues where our guests can easily maintain adequate social distancing.

**Meal Service:**

We will not be having self-serve meals this summer. Meals will be served by our staff following established health department protocols. Families will be assigned a table for the duration of the session which will either be outdoors or inside the cafeteria which will have safely distanced tables and open windows for increased air circulation.

**Restricted Access:**

To limit the exposure of our staff and family camp guests no visitors will be allowed at camp, except for deliveries from vendors who will be asked to follow the same safety protocols as our staff. Anyone who is unvaccinated against COVID-19 that needs to leave camp will be asked to follow state and local guidelines, including social distancing and mask wearing, to limit exposure.
